DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nigam.

Nigam (see fig. 8) discloses a spindle motor for a disk driving device comprising a housing (31,32) holding a stator (19) and a rotor at an outer circumference of which a magnet (21) is provided, which are supported mutually rotatively through a shaft (33) and bearings (21) having a spacer in between, wherein the housing is made of a resin and plastic (col. 17, ln. 62-66).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2834

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nigam in view of Nakagawa.

Nigam discloses essentially claimed invention except for the spacer and bearings molded in unitary manner.

Nakagawa discloses molded bearings in unitary for the purpose of low cost in manufacturing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made utilize the bearing structure of Nigam and apply the bearing molding of Nakagawa to provide bearing with a low cost in manufacturing.

6. Claims 4, and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nigam in view of Fukaya.

Nigam discloses essentially claimed invention except for the housing and an electric supply connector are molded in a unitary manner.

Fukaya discloses a housing (32) and an electric connector are molded in unitary for the purpose of low cost in manufacturing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made utilize the housing as taught by Nigam and accommodate the housing and the connector being molded in a unit which would provide a low cost in manufacturing.
